

VILE SMELLS INVADING YOUR AIRSPACE?

CONQUER PROBLEM ODORS WITH NWC'S INTEGRATED APPROACH TO ODOR CONTROL!

THE SYSTEM IS THE SOLUTION - POWERFUL, ECO-FRIENDLY ODOR CONTROL PRODUCTS AND HIGH TECH, TARGETED DELIVERY SYSTEMS

Proven and ready, NWC Odor Control formulations are engineered for compatibility with NWC alternative daily cover products. The result: a highly cost-effective, one-application landfill solution.

THE BACTERIA & ENZYME BRIGADE

Odor Colonel

Attacks and terminates alkaline odors — ammonia, amines, reduces solids in water treatment.

Odor Major

Misted or applied topically, destroys acidic odors — hydrosulfides & methyl mercaptans.

Odor Ranger

Your most efficient weapon against waste box and hauling equipment odors.

THE NEUTRALIZING INFANTRY

Odor Sergeant

Combats and neutralizes odors in landfills and transfer stations for as long as three days.

Odor Lieutenant

Quickly neutralizes troublesome alkaline odors like ammonia and amines.

Odor Corporal

Designed to attack acidic odors like hydrosulfides and methyl mercaptans.

NWC INTEGRATED SYSTEMS = THE SWEET SMELL OF VICTORY

Only NWC offers purpose-built SWAT technology - "Sprays Wide And Terminates" — to effectively vaporize odor targets. Armed with products from the Bacteria & Enzyme Brigade or Odor Neutralizing Infantry, NWC delivery systems eliminate virtually all odor problems.

This NWC CAPS-TF machine is designed and engineered with spray cannon capability for ADC application and superior odor control dispersion with its optional high volume tangential fans.

Powerful tangential fans on the high volume NWC ConCover TF 1000 disperse a highly effective Odor Control mist over a large area. This NWC formula alters the chemical nature of odor-causing molecules, rendering them harmless and odor-free.
